Experience

Summer Intern — GNCIPL Mar 2026 – May 2026
Full Stack Development (Remote)

- Built and structured Java-based backend modules, applying REST API design principles and OOP concepts.
- Developed reusable React.js components and integrated them with backend services via REST APIs.
- Managed version control and collaborative workflows using Git and GitHub.

Summer Intern — Banaras Locomotive Works, Indian Railways Jun 2025 – Jul 2025
Industrial Software Exposure, Varanasi

- Studied Locomotive Technical Software (LTS) systems and documented industrial software workflows.
- Observed and analyzed technical operations of large-scale embedded and enterprise systems.

Projects

Matty — AI-Powered Study Platform *React.js | Spring Boot | MongoDB* Live GitHub

- Architected a full-stack AI study platform with JWT-based authentication and role-based access control.
- Integrated AI chat API for context-aware study assistance; built notes management and analytics dashboard.
- Designed responsive UI with React.js; connected frontend to Spring Boot REST APIs with MongoDB persistence.
- Deployed frontend on Vercel; implemented CI-ready project structure with modular component architecture.

Developer Portfolio Website *React.js | HTML | CSS*

- Built a fully responsive portfolio showcasing projects, skills, and achievements with mobile-first design.
- Implemented smooth UI interactions, accessibility standards, and optimized load performance.
